

AMENDMENTS TO THE SPECIFICATION

On page 7, at line 16, please replace the paragraph with the following amended and new paragraphs:

Fig 10 shows to a scheme of a preferred embodiment for a feeding system and contact system capable of feeding several vehicles in a scalable form.

Figure 11 shows a flow diagram of a method embodying the invention.

Next a list of references is provided about the figures that could be used in the later concrete embodiment of the invention.

On page 9, after line 19, please insert the following new paragraph:

Figure 11 illustrates steps of a method of controlling a toy vehicle via a digital vehicle control signal that is applied to at least one electrically conductive trace of a toy vehicle track. This method also includes receiving a digital vehicle information signed at a remote controller, and displaying vehicle information on a remote controller. The steps of the method illustrated in Fig. 11 are discussed in greater detail in the following detailed description.
